

# The Real Cost of a Spill Isn't the Bag.

It's the volume used, the labor, and the disposal weight you haul away. BoneDry cuts all three.

~50%

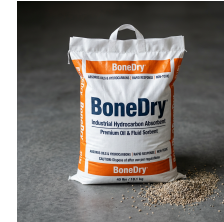

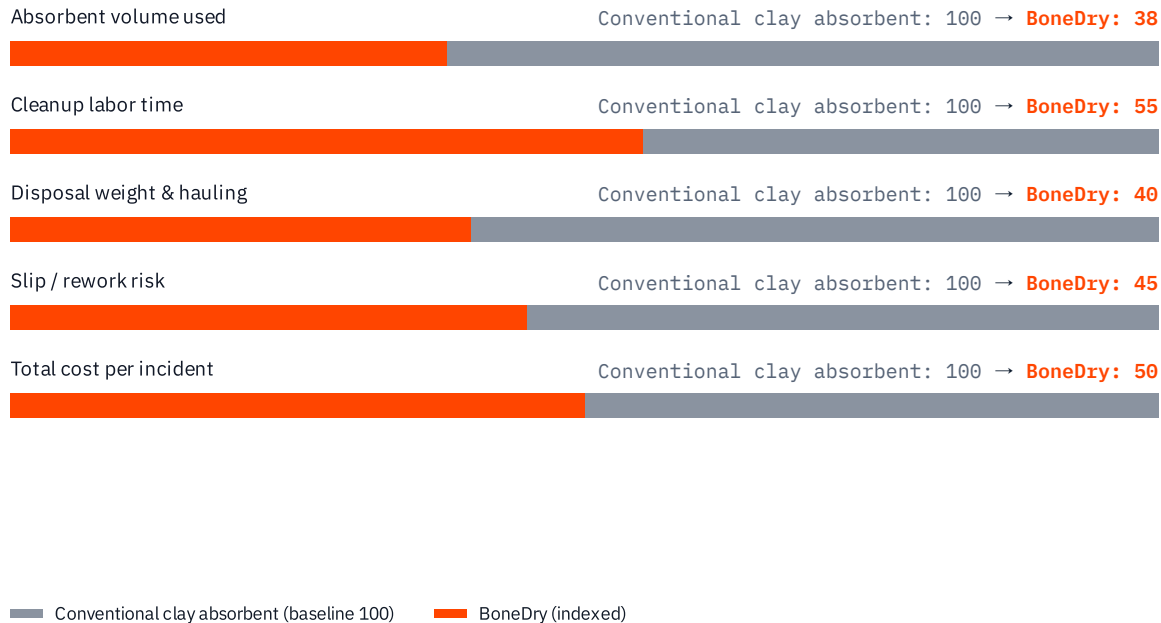

LOWER COST / INCIDENT

~60%

LESS DISPOSAL WEIGHT

## Up to ~50% lower cost per incident

Because BoneDry is lightweight and encapsulates hydrocarbons, crews use less material, spend less time on cleanup, and haul away far less disposal weight than with conventional clay absorbents.

### THE TAKEAWAY

 **Up to ~50% lower cost per incident**

Illustrative; actual results vary by spill type, surface, and disposal path.

**Model these numbers against your operation.**
