

SINGLE SOURCE MAT PARTNER

Ground Protection

Protect the topsoil today so the land keeps
producing for generations.

THE BOTTOM LINE

Topsoil is a long-cycle asset. Protect its structure now and it stays productive for the crops and cattle that follow the project.

Purchase or rent

(713) 725-7413 · oneharvestco.com

THE PROJECT ENDS. THE LAND KEEPS PRODUCING.

Heavy equipment turns productive ground into ruts and compacted scars that can take years to heal. Our full range of matting — timber, composite, steel, and rubber, including flagship Big Bad Mats — distributes loads and preserves soil structure so the land bounces back fast.

The right mat isn't a rental line item — it's how you keep topsoil intact and hand back ground that's ready to produce again.

HOW GROUND PROTECTION PRESERVES THE RESOURCE

- Distributes heavy loads — prevents rutting, compaction & topsoil destruction
- Reusable fleet — a long-cycle asset, not single-use waste
- Any mat for any job — timber, composite, steel, rubber; purchase or rent
- Faster site recovery — the ground returns to production sooner

PROTECTS ACROSS THE JOBSITE

- Access roads & haul routes
- Crane & rig platforms
- Utility right-of-way
- Turf & soil protection
- Trench & excavation

VALUE ON BOTH SIDES OF THE LEASE

FOR LANDOWNERS

Your soil structure and topsoil survive the project intact — productive ground, preserved value.

FOR OPERATORS

Visible land stewardship, cleaner restoration, and lower reclamation cost.
