### PHYSICAL & CHEMICAL

|                  |                            |
|------------------|----------------------------|
| Form             | Liquid concentrate         |
| Appearance       | Pink / rose liquid         |
| Solubility       | Fully water-miscible       |
| pH (in use)      | Near-neutral working range |
| Specific gravity | ~1.0–1.1                   |

### PERFORMANCE

|              |                               |
|--------------|-------------------------------|
| Clarifies    | Turbid, sediment-laden water  |
| Conditions   | Supports discharge parameters |
| Turbidity    | Rapid reduction               |
| Dose         | Low, volume-based dosing      |
| Effective on | Sediments, fines & residues   |

### APPLICATION

|           |                                    |
|-----------|------------------------------------|
| Use       | Dewatering, hydro-test, wash-water |
| Method    | Metered / batch dosing             |
| Equipment | Tanks, weirs, frac tanks, basins   |
| Scale     | Spot treatment to bulk programs    |

### ENVIRONMENTAL & HANDLING

|               |                         |
|---------------|-------------------------|
| Biodegradable | Yes                     |
| Handling      | Standard PPE            |
| Storage       | Ambient, avoid freezing |
| SDS           | Available on request    |

### ENVIRONMENTAL & COMPLIANCE

|   |                                                  |
|---|--------------------------------------------------|
| ✓ | Reduces hauled water volume & disposal footprint |
| ✓ | Biodegradable treatment chemistry                |
| ✓ | Supports discharge compliance & SWPPP programs   |
| ✓ | Turbidity reduction for permitted release        |

### CONFIGURATIONS

|                        |                            |                 |
|------------------------|----------------------------|-----------------|
| <b>1 Gallon Jug</b>    | Spot treatment & trials    | Small tasks     |
| <b>5 Gallon Pail</b>   | Recurring small-mid volume | Regular crews   |
| <b>55 Gallon Drum</b>  | Sustained treatment        | Active jobsites |
| <b>275 Gallon Tote</b> | High-volume continuous     | Bulk programs   |
